By MD Mr Marc Loh

THE YEAR OF THE EARTH DOG!

Dear Colleagues,

The first quarter of 2018 has come and gone in a jiffy. We recently celebrated Chinese New Year and ushered in the year of the Earth Dog! The Dog is the eleventh of the 12 Zodiac animals and symbolizes honesty and loyalty. This combined with the earth element, which indicates groundedness and strong foundation, indicates that this year should be a year where we should focus on our core abilities and strengths to do well! I believe this is very true and reflective for the LLC group as 2018 will provide many opportunities in our core abilities of water, power and railway with the implementation of the TNB Hydropower projects, the ECRL, HSR, Johor water project, etc! As long as we have a strong foundation and core

abilities combined with some luck and good timing, we should be able to do well this year!

We are in the midst of finalizing our 2017 numbers and 2017 has been a challenging year for the group as most of you are aware with our major projects reaching completion, the cost of commodities and forex increasing and the extremely challenging property market. This has been the story for the past 3 years but many believe that 2018 will be a better year as spending has picked up a bit and the general business sentiment has improved. However, elections are also around the corner and this will likely create more cautiousness in the first half of the year. Hopefully, decisions and stability will follow with the completion of the General Elections, which should spur the economy along.

I am pleased to inform that we have also recently taken over the 14MW Kerian Minihydro, and WET has mobilized to site and targets to finish up the works by mid 2018 to start generating power. This will be the tip of LLC group's strategy to spearhead into Renewable Energy Concessions to provide stable and long term income, which will help to buffer any volatility in Project implementation and Property development. We have also recently previewed our Kelana Jaya development, Panorama Development. The development comprised of Service apartments designed to capture the panoramic views of the greens of the subang golf course and the blues of the Kelana Jaya Lakes. Located only 300m from the LRT 2 Glenmarie station and the proposed LRT 3 station, the development is just a hop away from Subang, PJ and the city. Please spread the news to your friends and families as we are offering early bird discounts to the first 100 buyers!

Over the past few months, the new shareholders have been very busy and I have had the opportunity to meet frequently and work closely with them. I am very excited as the new shareholders inject in a vibrancy, energy and network that will be a catalyst to explosive growth! LLC Group is a 52years group with the strongest track record

in key water, railway and hydropower infrastructure, together with the people of LLC, this provides a strong vehicle but the shareholders and the management are the drivers and together I believe we are ready for explosive growth in 2018. I have been with the group for over 17years and although part of the family, I started at the bottom working in Putrajaya and have always been an employee and never a shareholder until the recent acquisition. Mr Woon, Mr Yan was my boss as well as Mr Lee HK, and I worked closely with WET on several tender proposals during my 17years. As an employee for such a long time, it is my belief that LLC Group should be a platform for growth for everyone, not only professionally but also socially and for our families! I am glad to inform that our new shareholders, YAM Tengku Laksamana Sulaiman Shah, YBM Tan Sri Dato Tengku Temenggong Mohamad Rizam, Mr Chatchaval Jiaravanon and my fellow management shareholders have this same belief. We would like to state that as LLC Group prospers, everyone will benefit, and together we will all prosper! The Board has also finalized our 6years strategic plan and it is our intention is to relist LLC Group by 2020! This should bring more opportunities to the group and everyone!
